

# FreightLX - Continuous Work Log

A living document to track tasks, contributions, discussions, and learnings during my internship.

<b>Name</b>	Nawaf Alhabib
<b>Role</b>	IT Intern
<b>Company</b>	FreightLX
<b>Start Date</b>	11 / 01 / 2026
<b>Last Updated</b>	26 / 01 / 2026

Purpose: A continuous log of my work at FreightLX. I update this document whenever I contribute to tasks, testing, discussions, or deliverables.

## Activity Log

### Entry #1 - Website Review & Early Feedback

Review / Ideation

11 / 01 / 2026

What I worked on

Reviewed the FreightLX website in its early stage and provided structured feedback on the overall experience, clarity, and flow. Shared initial thoughts and product/UX ideas, and contributed in discussions to explore possible directions for improving usability and decision clarity.

Why this was needed

The website was still early in development, so early feedback was important to identify unclear flows and improvement opportunities before heavy implementation.

Tools / skills used

UX and product thinking, critical analysis, clear communication, and problem-solving.

Outcome / result

Successfully contributed to shaping early ideas and discussions and helped influence thinking around improving the website experience.

Notes / learnings

Learned how early-stage products rely heavily on iterative feedback to form a clear direction, and gained exposure to product-level thinking beyond pure implementation.

## Entry #2 - Website Testing & Issue Report

QA / Reporting

Week of 18 / 01 / 2026

What I worked on

In the second week, started testing the FreightLX website, identified issues during testing, and documented them in an organized report. Prepared the document for a meeting with the developer and presented the findings to align on fixes.

Why this was needed

Early-stage products often contain hidden issues that impact user experience and trust. Structured documentation helps developers fix problems faster and reduces back-and-forth.

Tools / skills used

QA mindset, structured testing, documentation/reporting, collaboration, and presentation skills.

Outcome / result

Delivered an actionable issue document and successfully presented it to the developer to support prioritization of fixes.

Notes / learnings

Improved my ability to translate testing observations into developer-friendly, actionable reports and communicate issues clearly in meetings.

## Ideas & Suggestions (Optional)

Add future ideas here (even if not implemented yet). Keep them short and clear.

## Skills & Knowledge Gained (Growing List)

Add skills you improve during the internship (technical, communication, product thinking, etc.).
