SUMMARY

Fresh IT graduate (GPA 4.15/5) with hands-on DevOps experience at a Saudi logistics startup, where I proposed and led a CI/CD initiative across staging and production environments. Skilled in building reliable, automated infrastructure and practical technology solutions.

EXPERIENCE

FreightLX

Riyadh, Saudi Arabia

IT Intern — DevOps & Platform Operations

January 2026 – March 2026

- Proposed and led the CI/CD initiative using GitHub Actions, streamlining deployment workflows across staging and production environments and improving release stability.
- Integrated 12 sea ports into the freight search platform, expanding data coverage and improving search availability for end users.
- Configured and maintained deployment environments using Docker and Apache, reducing environment-related build failures through consistent setup standards.
- Enhanced platform search functionality and dashboard UI, improving interface consistency across the freight booking flow.
- Assisted in REST API integration, validation, and testing to support platform performance and reliability.
- Collaborated across development workflows using Git, GitHub Actions, Docker, and Apache.

PROJECTS

Intelligent Log Files Analyzer

Qassim University

Graduation Project

2024 – 2025

- Built an AI-powered log anomaly detection system achieving up to 95% accuracy across 3 benchmark datasets on structured and semi-structured log data.
- Designed an end-to-end data pipeline covering log ingestion, parsing, event template extraction (Drain3), sequence preparation, and ML-based anomaly detection.
- Technologies: Python, scikit-learn, pandas, NumPy, Drain3.

SKILLS

DevOps & CI/CD: GitHub Actions, Docker, Apache, CI/CD Pipelines, Environment Configuration

Backend & APIs: JavaScript, REST API Integration & Testing

Frontend: HTML, CSS, JavaScript

Data & AI: Python, Drain3, Log Analysis, Anomaly Detection

Version Control: Git, GitHub

Professional: Analytical Thinking, Requirements Analysis (BRD), Technical Troubleshooting, Leadership

EDUCATION

Qassim University

Saudi Arabia

BSc in Information Technology

2021 – 2026

GPA: 4.15 / 5.00

LANGUAGES

Arabic English — STEP 83
